## CUSTOMER SPOTLIGHT

Diversint is an acronym for Diversified Internet Services Group. Founded in 2000, Diversint succeeds because it adapts to the market demands of computing. The company offers traditional integration services for businesses such as server upgrades and migrations or PC and printer maintenance services. Diversint also offers ultra-high bandwidth fiber optic connectivity and expert supplemental staffing and consultative services related to data security, data management and organizational information systems security.

*“Like other businesses, Diversint has choices about its supporting cast of business partners. What makes Business Bank stand out for us is the professionalism that the organization combines with its personal approach. I attribute this to a Board that knows its customers, operational staff who know how to deliver products and service as well as a management team that bridges the gap between financial metrics and entrepreneurial vision. I will continue to grow with the bank and they with me.”*

Pete Vander Meulen  
– Diversint Owner
